

Solar  Screen

DATA JAMMER

Design
Privacy - Screen Privacy

Description

Data Jammer is a polarising technical film designed to protect sensitive on-screen information. Applied to the glass in front of LED or plasma screens, it blocks the image from the outside while keeping a clear view through the glass from the protected side, helping to secure data in meeting rooms, control rooms or shop windows.

Characteristics

Warranty
5 years

Fire Resistance Rating
M1

Storage in recommended conditions
1 years

REACH / RoHS
Compliant

Widths Available
122 cm

Installation Type
Interior

Color From the Outside
Transparent

Length
30.5 m

Construction

- 1 Protection PET release liner, disposable after installation
- 2 Scratch-resistant hard coating providing surface protection, durability, and ease of cleaning
- 3 High optical quality polyester
- 4 PVA film
- 5 High optical quality polyester
- 6 PS adhesive, polymerizes with glass within 15 days
- 7 Protection PET release liner, disposable after installation

Composition
PET + PVA

Thickness
132 µm

Optical and solar properties

UV Rejection (%)	99
Visible Light Transmission (%)	44
Glue	Pressure sensitive acrylic

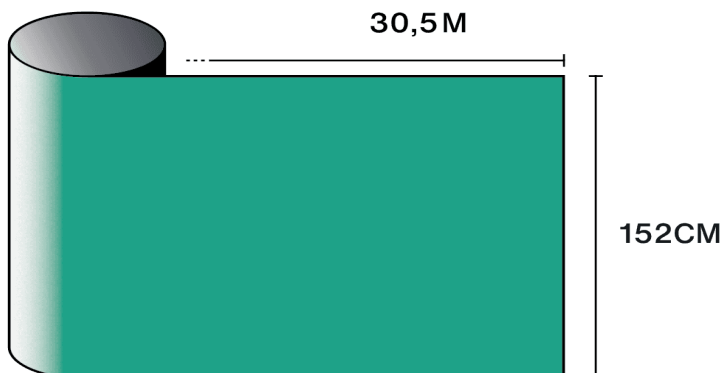

Application advice

Vertical situation and for a standard glazed surface
