SILVER 385 XC

Solar Control
Silver - Exterior

Description

Silver 385 XC features an advanced three-ply PET construction that provides outstanding performance and long-term weather resistance. It significantly reduces solar heat gain while allowing a moderate level of natural light to pass through. Its refined mirror finish offers strong glare control and daytime privacy, giving any façade a sleek, contemporary look.

Construction

- 1 Scratch-resistant hard coating providing surface protection, durability, and ease of cleaning
- 2 High optical quality polyester, with an IR-blocking metallic particle coating
- 3 Bonding adhesive
- 4 High optical quality polyester
- 5 Bonding adhesive
- 6 High optical quality polyester
- 7 PS adhesive, polymerizes with glass within 15 days
- 8 Protection PET release liner, disposable after installation

Installation and Maintenance Advise

Use Slide On (600-FO2) or Film On (600-F0355) diluted at 2 cL/L of water for installation and cleaning. Do not clean for one month after installation or apply stickers/adhesives on the film. For external installations, apply silicone to the film perimeter to prevent oxidation. Please refer to the notice "New Warranty for External Films".

⁰¹ Values based on a study carried out on an air-conditioned building located in Luxembourg, with a film applied on a low-E double glazing, facing East. The heating months considered are from October to March, and the cooling months from April to September. We consider an electric heating system of the heat pump type, with a production efficiency of 3.5 and an electric cooling system with an efficiency of 3. For more information, visit our online tool.
